Simple Safety: Cost-Effective Online Compliance Training for Small Companies

18-JAN-2012: BIRMINGHAM, MI. Making their exceptional compliance-focused learning solutions accessible to even the smallest companies, RDC is launching [ePILOT™ Simple Safety](#) to provide an affordable option to clients with only limited training needs. Targeted to companies with less than 20 employees, who may require only 2-5 courses, ePILOT™ Simple Safety presents a focused and flexible solution that bundles courses into a client-specific curriculum.

“We recognized that some of our clients have a more limited training requirement for meeting federal mandates and need a simple solution to meet those demands. For instance, a recent client with only 5 employees needed effective training on Confined Space Entry, Hydrogen Sulfide, and Fall Prevention. With Simple Safety, we delivered a cost-saving custom curriculum and they can now simply log on and complete training online,” says Brian Cormier, Director of Oil & Gas Solutions at RDC. “This program is designed to cost-effectively simplify compliance with training and safety regulations for these companies.”

Most companies benefit from access to the entire [ePILOT™ library](#). For these companies, a library subscription is cost-effective due to the comprehensive selection of titles available. But companies with limited training needs of only 2-5 federally mandated training courses and less than 20 learners will find Simple Safety presents the most cost-effective option. Small companies and independent contractors often do not operate from an office base and personnel may work from home or on the road. Simple Safety is available on demand via the internet so it is accessible to even these types of businesses.

All ePILOT™ courses are certified to stringent e-learning standards by the American Society of Training and Development (ASTD). Additionally, ePILOT™ is designed to satisfy the training requirements specified by different federal agencies including OSHA, DOT, EPA and BSEE for safe and environmentally sound operations. The 75 ePILOT categories include:

- Emergency Response
- Powered Industrial Equip
- Environmental
- Product/Process Standards
- Hazard Communication
- RCRA/Hazardous Waste
- HazMat Transportation
- Safe Work Practices
- Industrial Hygiene
